

PURINA
PRO PLAN
VETERINARY
DIETS

When pets suddenly switch from one diet to another, it can cause stomach upset and other issues. That's why it is important to slowly transition to a new diet. Gradually replace the old food with new food, increasing the amount every 1-2 days.

Make sure to keep enough of your current formula on hand for this transition. Please follow your veterinarian's instructions for total feeding amounts. Contact your veterinarian if you have questions or concerns.
